
Pocket Pro User Manual

Introduction

Pocket Pro is an Android application designed for cash desk operators (cashiers) to execute client service functions. It allows you to accept and process bets, register new clients, and manage deposits and withdrawals from client account balances.

Chapter 1: Getting Started

1.1 Downloading the Application

Before you can use the system, you must install the application on your device.

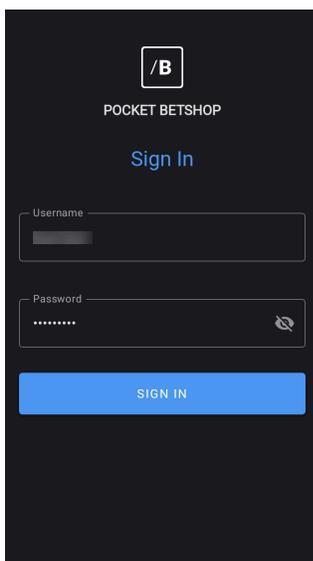

1. Tap the link provided by your representative: <https://partnersapp.teamroyale.vip/>

1.2 Signing In

Once the application is installed, follow these steps to log in:

1. **Username:** Enter the username provided by the BC representative.
2. **Password:** Enter your password.
3. **Sign In:** Tap the **Sign In** button.

Note: After signing in, the **Matches** section is displayed by default.

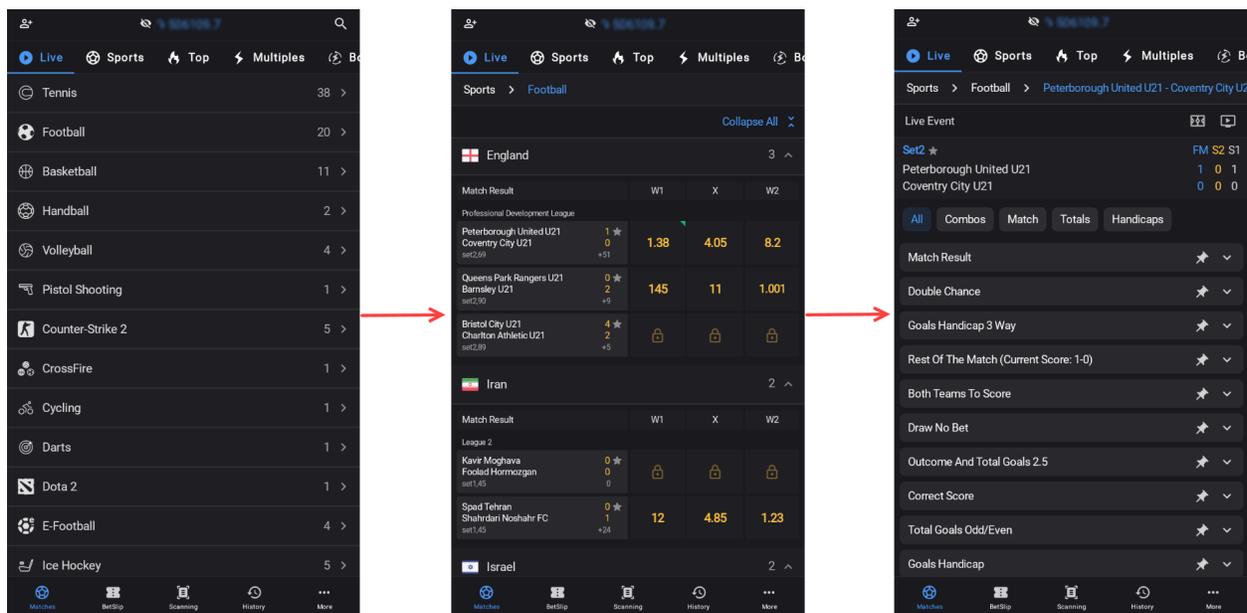

Chapter 2: Matches

The **Matches** section is where you view available live and upcoming matches and their betting markets. The top navigation bar contains seven specific tabs.

2.1 Live Tab

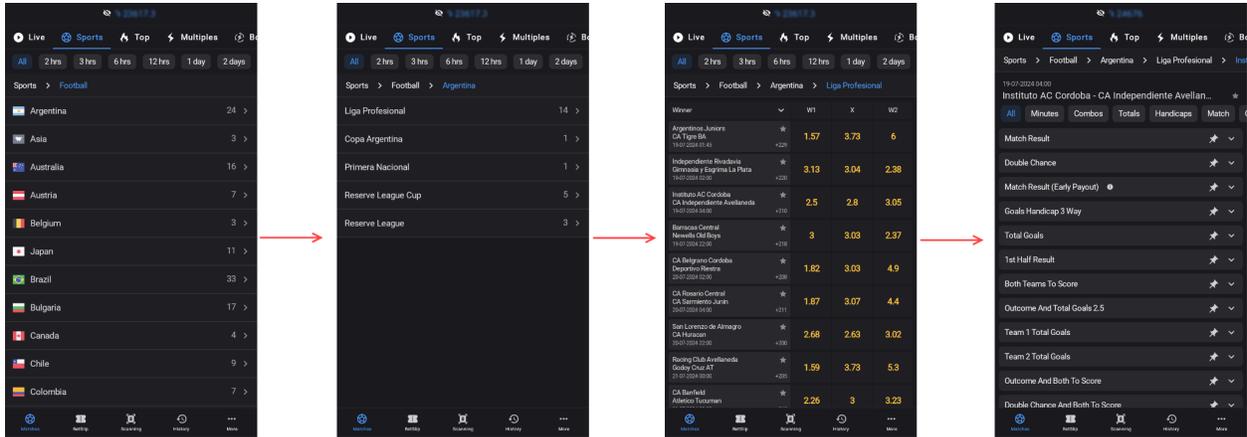

This tab displays matches currently in progress.

- **Navigation:** Tap a sport type to see competitions grouped by region.
- **Quick Bet:** You can place a quick bet by tapping directly on a top market (e.g., Match Result W2). The selection will immediately appear in your BetSlip.
- **Card Info:** Each match card shows the competition name, match name, number of markets, current score, and top markets.
- **Detailed View:** Tap the match name to see all offered markets and a live animation of the match.
- **Pinning Markets:** Tap the **Pin** icon to fix a specific market to the top of the screen for quick reference. Tap the **Unpin** icon to remove it.
- **Searching:** Tap the **Search** button to find a specific match by name.

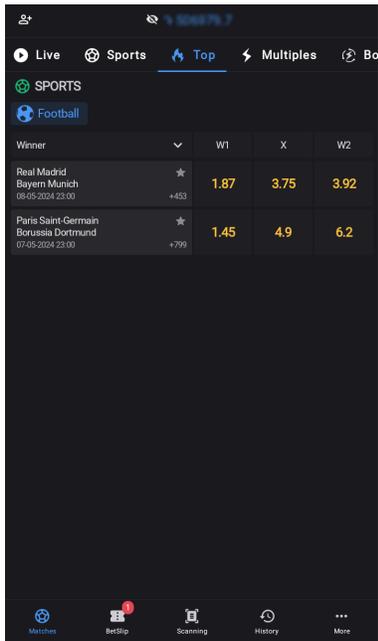

2.2 Sports (Prematch) Tab

This tab displays upcoming matches. It functions similarly to the Live tab but displays the exact start date and time instead of a live score.

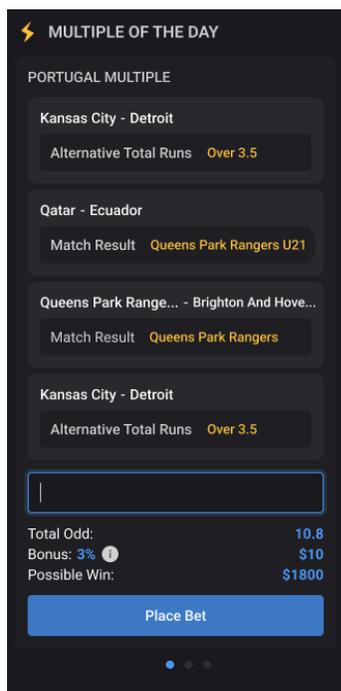

2.3 Other Match Tabs

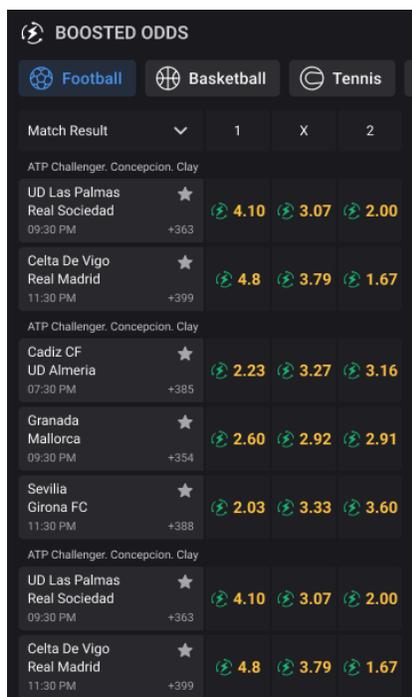

- **Top:** Displays the most popular sporting events for easy access.

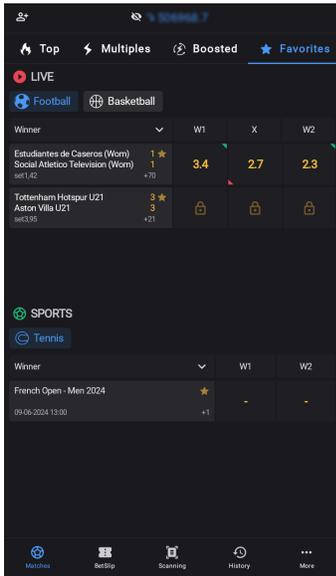

- Multiples:** Displays matches featuring the **Multiple of the Day**. This allows players to win enhanced payouts on predefined accumulator bets prepared by bookmaker experts.

- Boosted:** Displays matches with **Boosted Odds** (higher potential winnings for specific outcomes compared to standard odds).

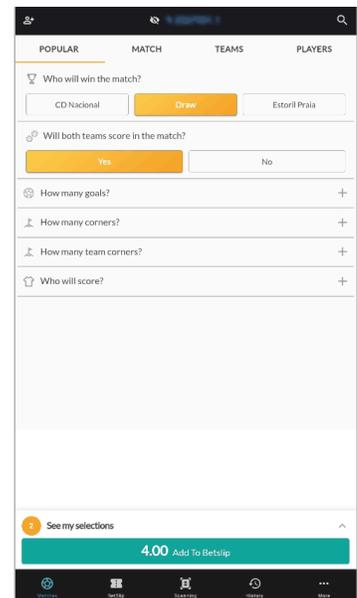

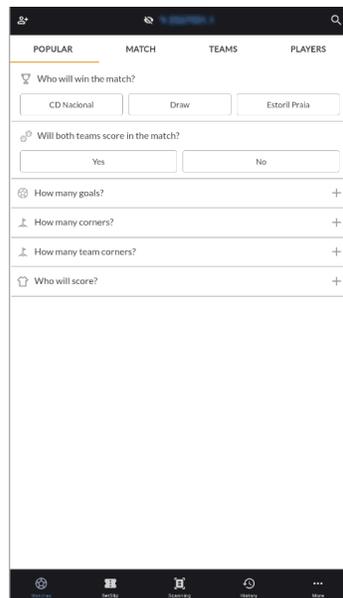

- **Favorites:** Displays matches you have marked as favorites. Tap the **Star** icon next to a match name to add or remove it from this list.

2.4 Bet Builder (BB)

The Bet Builder allows you to create a customized bet by combining multiple selections from the *same* match into a single wager.

1. Tap the **BB** button next to a match name to open the BetBuilder window.
2. Select multiple markets from that single match. Real-time odds will update automatically.
3. Review your choices in the **See My Selections** pop-up.
4. Tap the **Add To Betslip** button. The system will display the total odds next to this button.

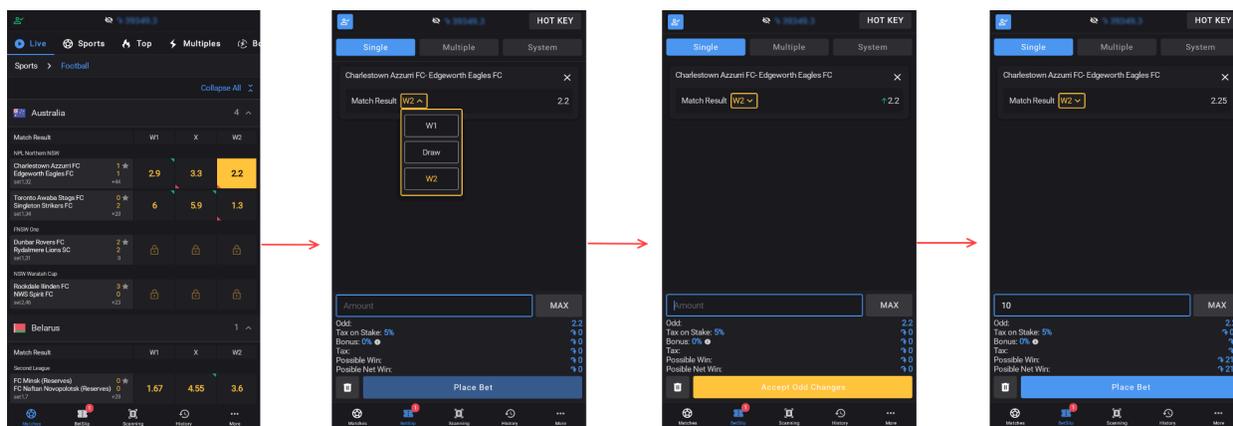

Chapter 3: BetSlip

The BetSlip section is where you configure amounts and finalize bets.

3.1 Step 2: Placing the Bet

1. **Select Markets:** Add markets to the BetSlip by tapping on them in the Matches section.
2. **Select Bet Type:** Choose **Single** (one event), **Multiple** (2+ events, all must win), or **System** (3+ events, wins even if not all predictions are correct).
3. **Set Stake:** Enter the amount manually or tap the **Max** button to bet the maximum allowed limit.
4. **Confirm:** Tap the **Place Bet** button.

Note: If odds change during placement, you must tap **Accept Odd Changes** to proceed.

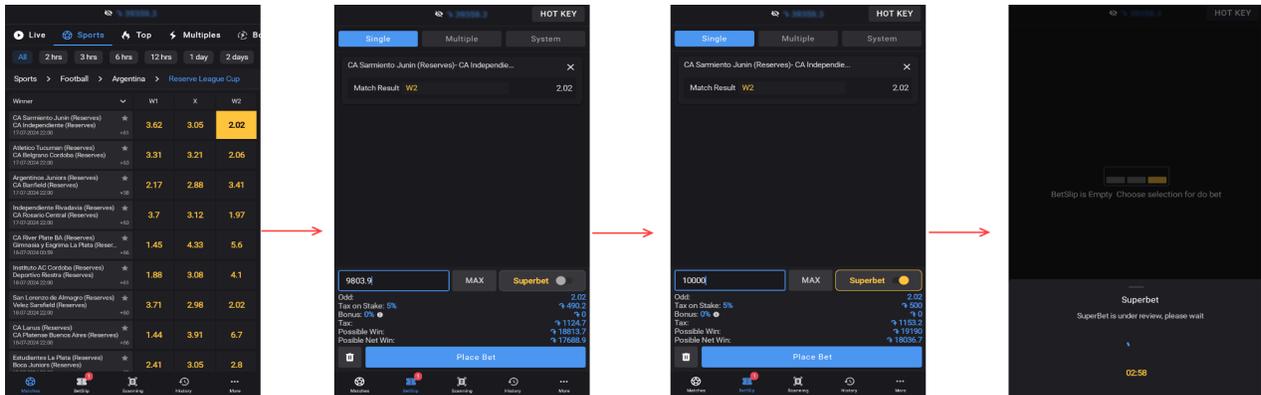

3.2 Advanced Betting Features

3.2.1 Super Bet

Use this to place a bet that exceeds the system's maximum limit.

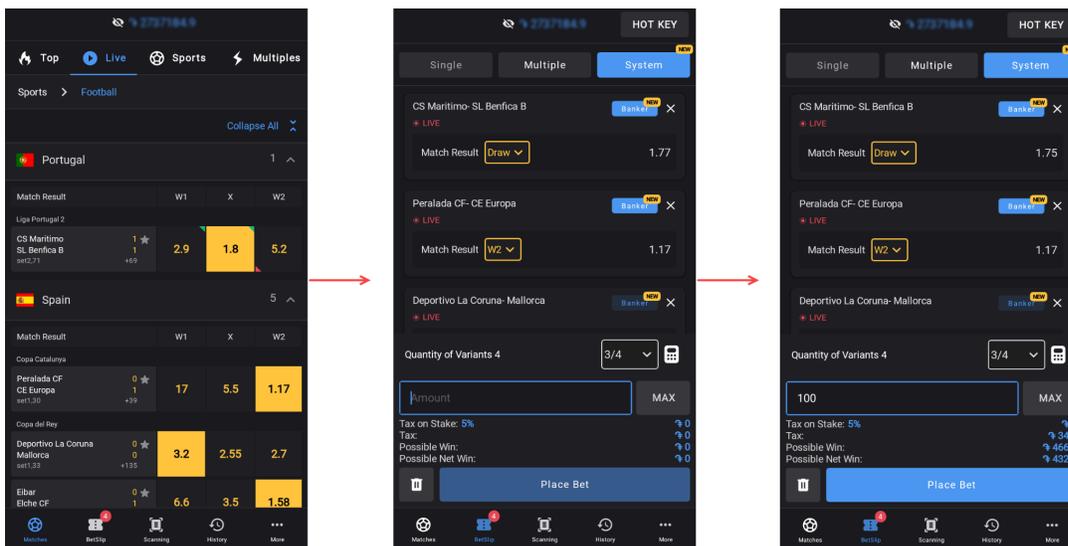

1. Turn on the **Super Bet** toggle in the BetSlip.
2. Enter the preferred stake amount and tap **Place Bet**.
3. The bet will go under review. You will receive a notification if the Super Bet is accepted or rejected.

3.2.2 Banker Bet

Use this within a **System** bet to mark a highly confident selection as mandatory.

1. Select at least three events.
2. Choose the **System** bet type.
3. Tap the **Banker (B)** button next to your confident selection.
4. Enter the unit stake and place the bet.

Chapter 4: Scanning

Use the **Scanning** section to verify tickets and manage placed bets.

4.1 How to Scan a Ticket

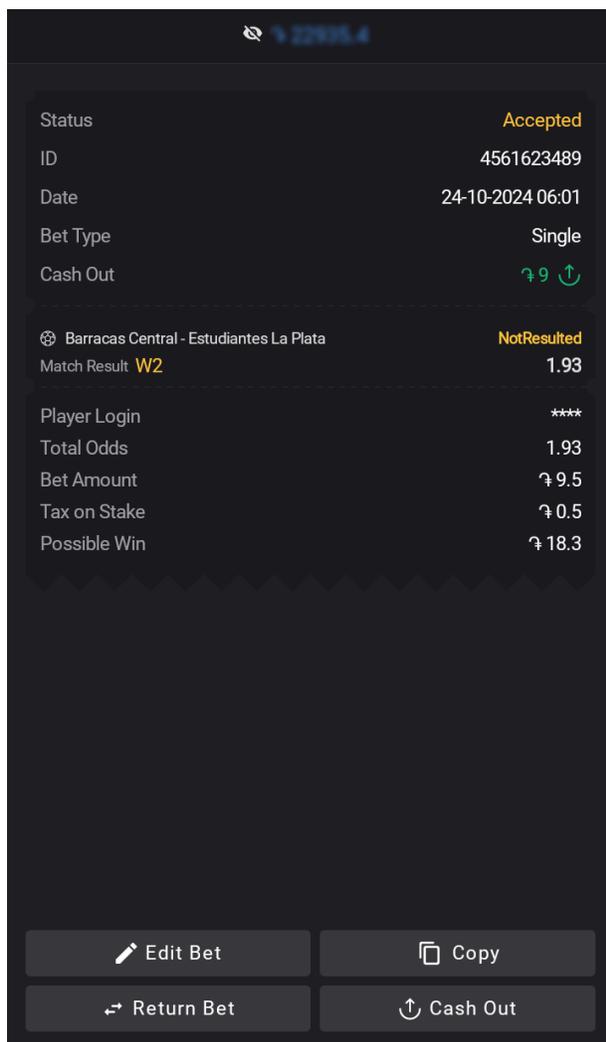

1. **Camera:** Use the device camera to scan the barcode on the physical ticket.
2. **Manual:** Enter the barcode number manually into the field and tap **Check**.

4.2 Ticket Actions

Once a ticket is scanned and verified, you can perform the following actions using the buttons at the bottom of the screen:

- **Edit Bet:** Opens the ticket in the BetSlip to modify stakes or selections. Requires **DNI Verification** to proceed. Tap **Change** to finalize the edit.
- **Copy:** Duplicates the bet details into a new BetSlip for quick re-betting.
- **Return Bet:** Cancels the bet (if allowed) and refunds the stake. A confirmation pop-up will appear.
- **Pay:** Settles the bet and amount deducts from cashdesk balance. (Money must be paid to player)

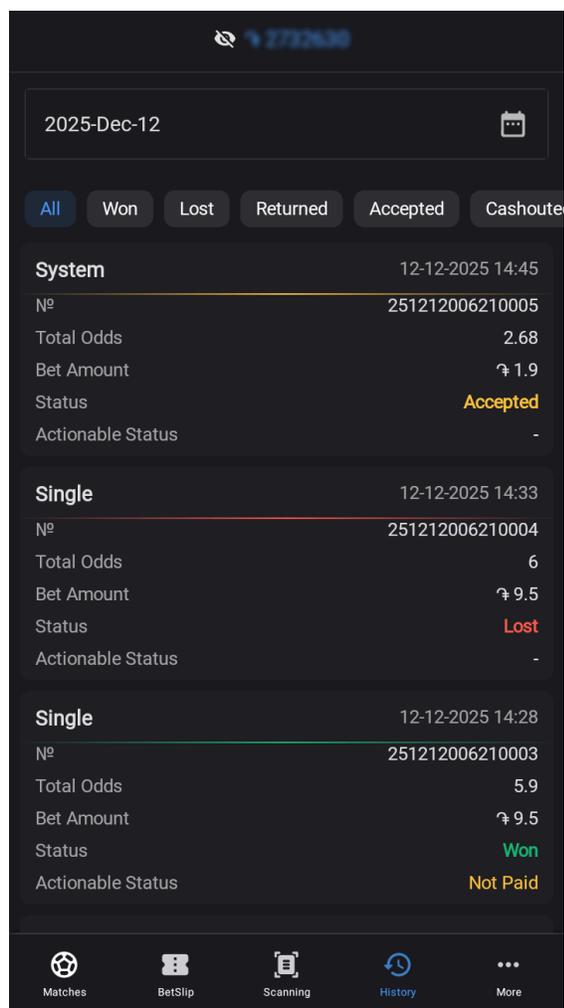

Chapter 5: History

The **History** section displays detailed information on all previously placed bets.

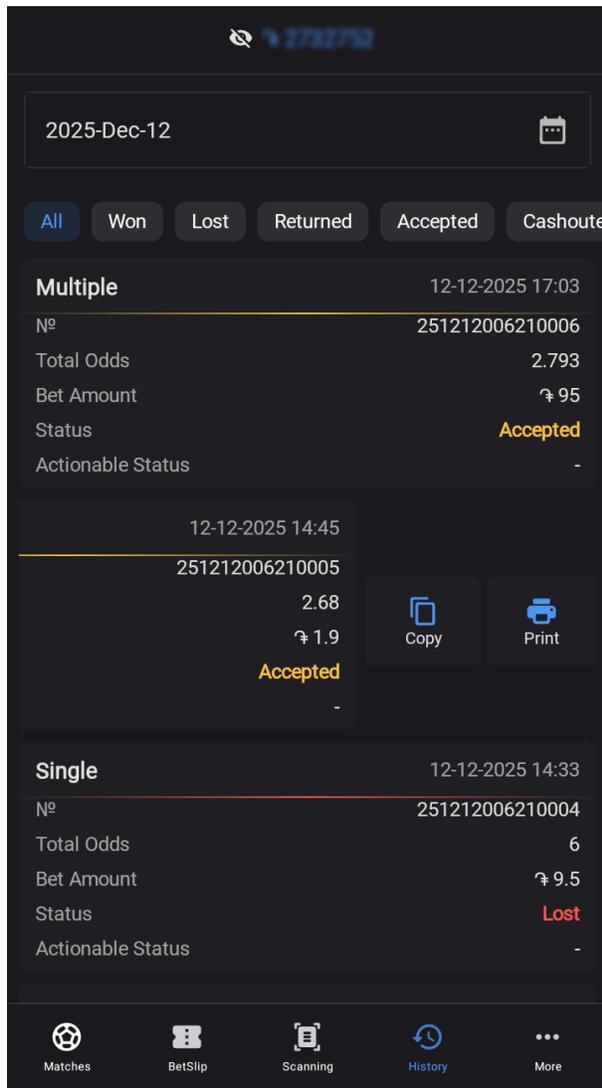

5.1 Viewing and Filtering

- **Filter by Status:** Use the tabs at the top to filter bets by **All**, **Won**, **Lost**, **Returned**, **Accepted**, or **Cashouted**.
- **Filter by Date:** Tap the calendar icon to select a custom date range or presets like "Today" or "Last 7 Days".
- **Live Indicators:** If a listed bet contains a live event, a **Live** icon will appear above the event name.

5.2 Managing Bets from History

- **View Details:** Tap any bet row to see full details (Match, Market, Odds).
- **Quick Actions:** Swipe a bet row to the left to reveal quick **Copy** and **Print** buttons.
- **Copy:** Tap **Copy** to load the exact bet details into your BetSlip (ensure BetSlip is empty first).
- **Print:** Tap **Print** to generate a physical ticket.

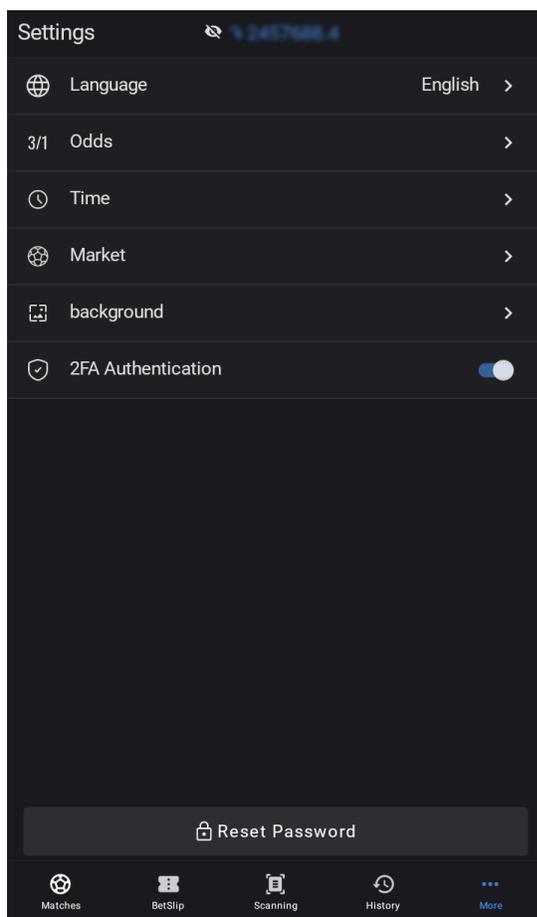

Chapter 6: More

The **More** section handles administrative tasks, client management, and settings.

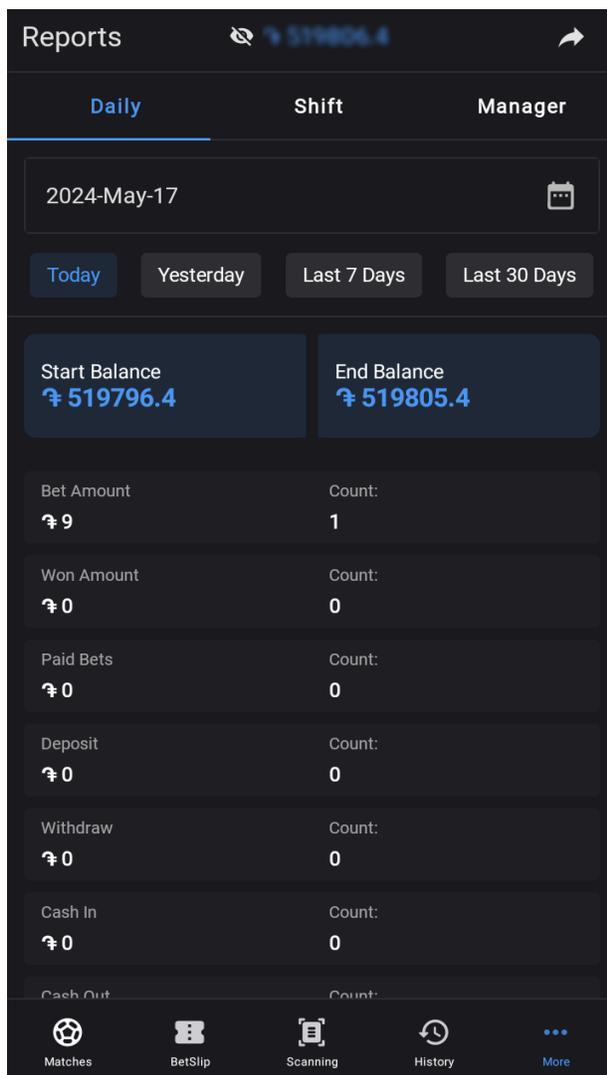

6.1 Settings

- **Language:** Change the application language.
- **Odds:** Select your preferred odds format (Decimal, Fractional, American, etc.) and odds change behavior (e.g., "Always Ask").
- **Time:** Change the time format.
- **2FA Authentication:** Enable Google Authenticator for login security. Toggle it on, scan the QR code, and enter the 6-digit code.
- **Reset Password:** Change your login password. The new password must be at least 8 characters and include uppercase, lowercase, numbers, and special characters.

6.2 Reports

- **Daily:** View transaction lists and start/end balances for the day or a custom period. Tap the print icon to print a report.
- **Shift:** View transaction lists and counts for the current shift.
- **Manager:** (Manager level only) View reports for all cashiers under your supervision.

FAQ

- How do we own an account?
 - To participate, Operators, Bar Owners, and Individual Runners must file an application on our website and satisfy all KYC verification requirements. URL: <https://sportskasosyo.teamroyale.vip>
- How do we acquire the device needed?
 - To use the app, operators can either pair a personal Android device with a Bluetooth printer or invest in a standalone Android POS machine. These machines typically retail for approximately 5,000 to 10,000 PHP.
- How do we start operating?
 - Operations may only begin once an initial fund is settled. This amount determines the operator's maximum exposure and holding balance.
- How do cash in works?
 - Once your maximum balance is established, you may begin processing bets and collecting funds. As transactions occur, your balance will accumulate. If the total reaches your preset limit, the device will display a 'Limit Exceeded' notification, preventing further betting. To resume operations, you must remit the accumulated funds to us, after which your limit will be fully replenished.
- How do cash out works?
 - You may do the cashout yourself with your players, every cashout amount done by you will be replenished back to your limit so you can accept more bets, however you can request for cashout assistance to provider for above specific amount determined by provider, but the amount will not replenish back to your limit as the provider is the one shouldered the cashout.
- How will operators transfer and accept money to/from the provider?
 - Every transactions will be done via our provided website in which your deposit can be done via GCASH, MAYA or any QRPH supported banks or wallets.
